

What is CCTV?

CCTV means "Closed Circuit Television". CCTV system is used to monitor and or record the activities in an area for the purpose of safety and protection of property.

Why do I need CCTV?

CCTV helps to protect your business and staff; it is a visible deterrent against theft and vandalism. CCTV can also be useful in home security to monitor and protect the drive and gardens. CCTV footage can be invaluable in the identification and prosecution of the perpetrators of crimes.

What are the features of a CCTV system?

The principal features are monitoring and recording. CCTV monitoring is the real time viewing of images from CCTV cameras sent to one or more CCTV monitors. CCTV recording is the process of recording and storing of images from CCTV cameras sent to a VCR, Digital Video Recorder or Computer.

How do I choose the right CCTV?

The choice of a CCTV system will depend on your needs and your budget. You would need to consider the cameras and recording media suitable to your requirements. Contact several CCTV suppliers for information on their products and installation services. Consider Pentagon Building Systems CCTV packages.

Can I supply my own CCTV equipment?

You may supply your CCTV equipment to be installed for you subject to installation costs. However we do not offer any guarantee on the installation of equipment that are not supplied by us.
